EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Rebecca Goldman Rudich on January 04, 2005.

The application has been amended as follows:

In claim 1, line 7, "the upper case" has been changed to --an upper case--.

In claim 12, line 9, "the upper case" has been changed to --an upper case--.

Election/Restrictions

2. After further reviewing the restriction requirement mailed on 09/29/04, the examiner is hereby withdrawing the restriction requirement and thus all the claims 1-21 are examined on the merits.

Allowable Subject Matter

3. Claims 1-21 are allowed.

4. The following is an examiner's statement of reasons for allowance:

5. The prior arts of record do not anticipate or render obvious to one skilled in the art an LCD mold frame assembly comprising various elements as claimed, more specifically a plurality of connection plate coupling parts corresponding to PCBs attached to the rear side of the main frame, wherein the connection plate coupling parts are integral to the main frame along edges of the main frame and a plurality of ground connection plates coupled to the plurality of connection plate coupling parts, for grounding ground terminals of the PCBs to an upper case.

1. USPAT 6,667,780 discloses an LCD frame assembly. USPAT 6,587,355 discloses a liquid crystal display module that is adaptive for improving ground connection between a printed circuit board and a ground plate. USPAT 6,587,166 discloses a liquid crystal display assembly including a mold frame having an integral gate PCB receiving portion, and a source PCB receiving portion. USPAT 6,583,831 discloses a liquid crystal display device capable of preventing a grounding clip, which is combined to an end of a mold frame to ground a printed circuit board to a chassis from making electrical contact with a display unit. USPAT 6,473,146 discloses a liquid

crystal display device in which a plurality of grounding protrusion are formed in a region not having a signal transmission pattern among the bottom surface of a printed circuit board in contact with a bottom chassis. However, all of the prior arts alone or in combination with any other prior arts fail to teach or suggest the claimed LCD mold frame assembly wherein a plurality of connection plate coupling parts are integrally formed along the edges of the main frame and corresponds to PCB s attached to the rear side of the main frame and a plurality of ground connection plates coupled to the plurality of connection plate coupling parts for grounding ground terminals of the PCBs to an upper case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
